

ECU remap suitable for VW Amarok 2ltr Twin Turbo

The 2ltr twin turbo Amarok gets a fantastic gain with a remap. The most noticeable difference our customers experience is the 20% plus extra power in the very low rev range -making it a lot more drivable by removing most of the bottom end lag.

Dyno Performance Data

At Wheels	Standard	Stage 1
Power (kw)	78	101 (+30%)
Torque (nm)	286	340 (+19%)

Stage 1- Remap of Standard ECU

Note: Actual figures may vary depending on mechanical performance of individual vehicle

Stage 1 Tune with Standard Vehicle

VEHICLE DATA SHEET

Our Mission

To provide you with the best possible performance result whilst still retaining the reliability of your vehicle.

Our ECU remapping process includes a full vehicle health check with our state of the art diagnostic equipment and Chassis Dyno (ALL Wheel Drive).

We Dyno test your vehicle checking current injector tolerances, air fuel ratio & boost pressures to name a few. Once we have given your vehicle a clean bill of health we then custom tune/remap the vehicle depending on our customers requirements.

When completed a Dyno sheet is printed for you, clearly identifying the gains of your vehicle's before & after performance.
