

ECU remap suitable for Nissan Navara D22 2.5L

Awesome gains when we remap the D22 Navara. Low to midrange drivability is totally transformed with a massive 42% gain at 2500rpm. Customers often call us up & comment on their disbelief in the performance difference.

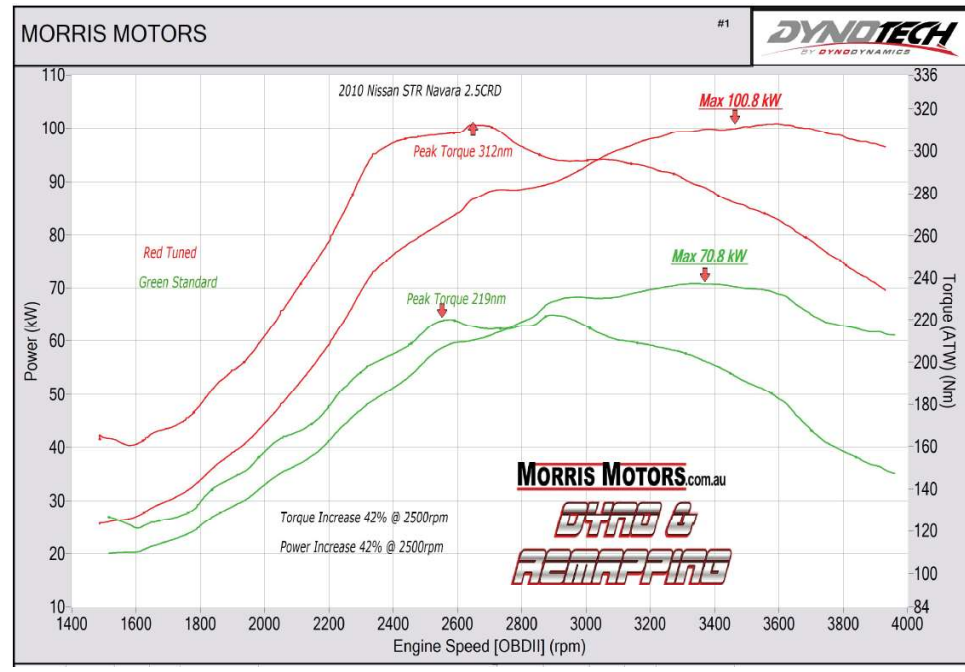

Dyno Performance Data

At Wheels	Standard	Stage 1
Power (kw)	70	100 (+42%)
Torque (nm)	219	312 (+42%)

Stage 1- Remap of Standard ECU

Note: Actual figures may vary depending on mechanical performance of individual vehicle

Stage 1 Tune with Standard Vehicle

Our Mission

To provide you with the best possible performance result whilst still retaining the reliability of your vehicle.

Our ECU remapping process includes a full vehicle health check with our state of the art diagnostic equipment and Chassis Dyno (ALL Wheel Drive).

We Dyno test your vehicle checking current injector tolerances, air fuel ratio & boost pressures to name a few. Once we have given your vehicle a clean bill of health we then custom tune/remap the vehicle depending on our customers requirements.

When completed a Dyno sheet is printed for you, clearly identifying the gains of your vehicle's before & after performance.
