

ECU remap suitable for Toyota Land Cruiser V8 Single Turbo

The V8 single turbo Land Cruiser benefits from an ECU remap extremely well.

We can transform your Cruiser into the vehicle it should be with either a Stage 1 or Stage 2 (with exhaust) tune. The performance gains are incredible, over 60% more torque & 54% more power where you need it, our dyno results really do speak for themselves.

After this remap, you'll cruise up hills and be able to overtake safely when towing.

**Morris Motors has no affiliation with Toyota and services offered by our company may impact on your vehicle manufacturer warranty as well as the fuel efficiency and emissions of your vehicle.*

Dyno Performance Data

At Wheels	Standard	Stage 1
Power (kw)	125	154 (+23%)
Torque (nm)	362	581 (+60%)

Stage 1- Remap of Standard ECU

Note: Actual figures may vary depending on mechanical performance of individual vehicle

Our Mission

To provide you with the best possible performance result whilst still retaining the reliability of your vehicle.

Our ECU remapping process includes a full vehicle health check with our state of the art diagnostic equipment and Chassis Dyno (ALL Wheel Drive).

We Dyno test your vehicle checking current injector tolerances, air fuel ratio & boost pressures to name a few. Once we have given your vehicle a clean bill of health we then custom tune/remap the vehicle depending on our customers requirements.

When completed a Dyno sheet is printed for you, clearly identifying the gains of your vehicle's before & after performance.
